IIPP, University College London

2 March 2018

Talking Points

- Policy for financing low carbon energy transition is crucial

- Redistribution from transfers can be an issue

Talking Points

- Policy for financing low carbon energy transition is crucial
 - State financed historical transitions

- Redistribution from transfers can be an issue

Talking Points

- Policy for financing low carbon energy transition is crucial
 - State financed historical transitions
 - Not first mover, but critical for scaling up

- Redistribution from transfers can be an issue

Talking Points

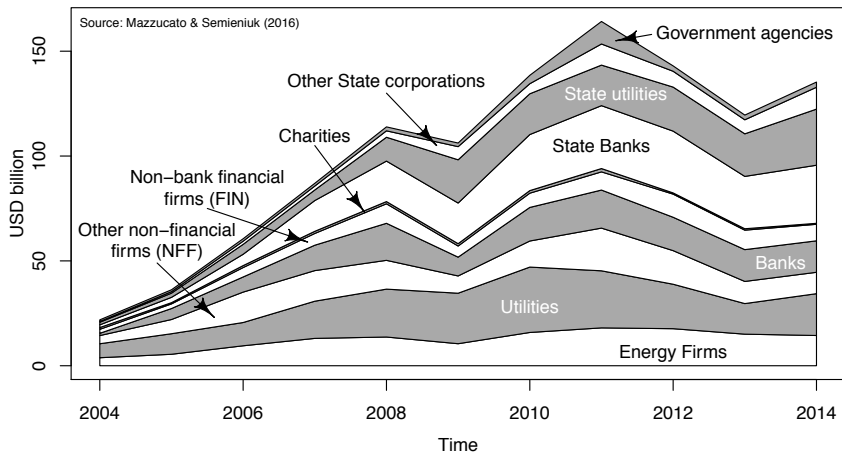

- Policy for financing low carbon energy transition is crucial
 - State financed historical transitions
 - Not first mover, but critical for scaling up
 - Today, direct public investments along 'innovation chain' a large portion of total

- Redistribution from transfers can be an issue

Talking Points

- Policy for financing low carbon energy transition is crucial
 - State financed historical transitions
 - Not first mover, but critical for scaling up
 - Today, direct public investments along 'innovation chain' a large portion of total
 - In RE asset finance, 40% of global investments public
- Redistribution from transfers can be an issue

Time series of global asset finance in renewable electricity capacity 2004-14, broken down by type of investor

Talking Points

- Policy for financing low carbon energy transition is crucial
 - State financed historical transitions
 - Not first mover, but critical for scaling up
 - Today, direct public investments along 'innovation chain' a large portion of total
 - In RE asset finance, 40% of global investments public
 - Indirect financing (FiT, tax credit...) also central
- Redistribution from transfers can be an issue

Talking Points

- Policy for financing low carbon energy transition is crucial
 - State financed historical transitions
 - Not first mover, but critical for scaling up
 - Today, direct public investments along 'innovation chain' a large portion of total
 - In RE asset finance, 40% of global investments public
 - Indirect financing (FiT, tax credit...) also central
- Redistribution from transfers can be an issue
 - Spain
